

I am a satellite radio listener, and have been anxiously awaiting the roll out of XM radio traffic and weather to Portland, OR. Satellite radio provides variety and quality that are not available elsewhere. I pay extra money for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide this kind of programming.
